

MAI
2018

A close-up photograph of a honeybee on a lavender flower. The bee is positioned in the lower-left quadrant of the frame, facing right. It is actively foraging, with its head and legs on the small, light-colored flowers of the lavender spike. The background is a soft, out-of-focus field of lavender flowers, creating a sense of depth and a natural setting. The overall color palette is dominated by the purples and blues of the lavender, with the yellow and black stripes of the bee providing a strong contrast.
